

Smart Design for Your Home

BRYANT®

Bryant tradeSELECT® and netSELECT® Residential and Network Wiring Products for Your Home

Select the best when it comes to electrical devices and voice/data products. Choose Bryant for the superior performance, innovation and style that your home deserves.

Styling for Looks and Safety

Our range of products makes a difference. GFCI and AFCI receptacles provide the best in people and fire protection, minimizing worry about shocks and electrical fires. Tamper-resistant receptacles reduce the risk of injury by preventing foreign objects from making electrical contact. New nightlight switches and receptacles provide a guiding light without using too much energy. But putting safety first doesn't mean that aesthetics should be ignored. To align with residential décor, Bryant wiring devices are offered in a full range of designs that blend beautifully with furnishings and finishes.

Energy Savings Like Never Before

Energy efficiency isn't just good for the environment – it's good for homeowners, too. Occupancy sensors and timers offer real energy savings so you can enjoy significant long-term, ongoing reductions in electric bills. Bryant offers a range of options for controlling residential energy use. Sensors turn

lights on when you need them, and automatically turn them off when you leave the room. Digital timers provide economic lighting and fan control with just the touch of a finger. LED-compatible dimmers allow you

to control lighting levels, offering just the right atmosphere with comfort and convenience.

Technology and the Interconnected World

To accommodate advanced electronic devices, homes need to be wired for the ever-changing pace of technology. Not only should wiring systems complement aesthetics, but they should also be efficient, reliable, and safe in order to support computers, televisions, and security systems. From network enclosures to USB charging stations, Bryant has a broad line of products that are specifically designed to support the connectivity and power needs of homeowners.

Safety
