Economy Stainless Steel Support Grips

Maximum Performance:
Strength and Corrosion Resistance

Bryant's Economy Stainless Steel Support Grips provide exceptional immunity to rust and corrosion with superior strength and flexibility for heavy-duty holding applications. Harsh environments demand products that perform and last. This is why each grip is engineered and manufactured to meet highly specific performance levels for demanding applications. As a result, Bryant offers a complete line of support grips ranging from the most common single weave U-eye to an extra heavy-duty double weave with double U-eye attachments. Bryant provides grips in size ranges 1/2" to as large as 4.0" accommodating multiple cable types and diameters.

Stainless Steel manufactured grips are mechanically stronger than those using tinned bronze. As a result, many cable support applications for heavy loads and long runs prefer stainless steel. A key advantage with stainless is its inherent resistance to corrosion from chemical exposure and caustic environments, like those near salt water, wastewater treatment facilities, and in the mining industry. The stainless steel stranded wire is woven and assembled with critical precision to ensure the highest level of performance and reliability. To this wire are added strand equalizers and large support eyes to deliver attachments capable of withstanding the most demanding use. The application of stainless steel will provide the double benefit of strength and corrosion resistance, with the outcome of durability and long life. With Bryant Economy Cable Grips you can be confident that your cable operation will perform optimally with minimum effect by stress, strain, vibration and tension. Superior safety and security are the end result.

Features and Benefits

- Full line offering in Single and Double Weave, Closed, Split Lace and Split Rod Styles
- 304 Grade All Stainless Steel Construction
- 1x7 Stranded Stainless Steel Wire for Maximum Flexibility and Resiliency
- Large Formed Eyes to Minimize Strain, Stress and provide long life at support attachments
- Helicoidal Strand Equalizers uniformly spread weight and allow flexibility when under stress
- All grips are marked/tagged for size identification

Superior Safety & Security

ORDERING DATA

BRYANT ECONOMY STAINLESS STEEL SUPPORT GRIPS

SPECIFICATIONS

APPLICATIONS

- High Strength Support
- Long Cable Drops
- Corrosive/Chemical Environments
- Severe Service
- Unusual Environmental Conditions
- Commercial/Factory/Utility

MATERIALS

- Mesh - Stranded 1x7 304 Stainless Steel Wire
- Eye - 304 Stainless Steel One-Piece Crimp Tubing
- Strand Equalizer - 304 Annealed Stainless Steel Wire
- Variable Weave Mesh
- Slightly Magnetic

STANDARDS

- CSA Certified File #LR701228

PRODUCT SELECTION CHART STANDARD DUTY GRIPS

SINGLE WEAVE	CLOSED GRIPS			APPROX. BREAKING STRENGTH
	U-EYE	DOUBLE U-EYE	SINGLE OFFSET EYE
